

JS LAB – 2

Q. Create a form to get the list of number from user. Sort the numbers according to their product of digits and display the result

Step 1: Create a form to get the user input.

Step 2: Sort the numbers according to their product of digits as given in the example below:

Input: arr[] = {12, 10, 102, 31, 15}

Output: 10 102 12 31 15

10 -> $1 * 0 = 0$

102 -> $1 * 0 * 2 = 0$

12 -> $1 * 2 = 2$

31 -> $3 * 1 = 3$

15 -> $1 * 5 = 5$

Input: arr[] = {12, 10}

Output: 10 12

Step3: Use Arrow function to evaluate the output. Create a <p> tag and append the output there.

Topic Covered:

- HTML, CSS
- JS, JS DOM
